# OUR CORE IS SERVICE

**KERN-DEUDIAM Diamantwerkzeuge und Maschinen GmbH** has been developing and manufacturing premium diamond tools and machines in Germany since 1977. As a progressive thinking family-owned company with worldwide business relations during all these years we evolved to one of the leading German diamond tool manufacturers and asserted ourselves successfully on the international markets with professional, innovative and reliable quality products. This leadership is to sustain by the constant search for improvement of our products and applied technology.

Our premium goods 'Made in Germany' are highly valued internationally and shipped from Germany to more than 70 countries on 5 continents every year. These include diamond core drills, saw blades and segments, grinding tools, complete drilling systems as well as cutting machines, e.g. electric or petrol floor saws – made by and for professionals and manufactured to the highest quality standards. For **KERN-DEUDIAM**, quality is not just a word, but it can be seen and measured in our products, for which we are ISO 9001:2015 certified.

With more than 60 employees, we handle the complete process of diamond tool production, starting with the segment production and ending with the finished product, along with a modern design, smart packaging, clever marketing solutions and outstanding service. Our special solutions for the most diverse customers from all over the world require constant adaptation to the machines used, the processed materials, and of course to individual customer requirements. Rational working processes, constant application of new materials, investments in the newest production equipment as well as intensive research and development are an absolute must in our strive for perfection. Thanks to our own departments for research and development at the German headquarters, we are able to suit to individual demands and optimization needs more rapidly, even for small series, to realize the 'little bit extra' in performance for you.

It is always you and your needs that are most important for us – regardless of whether we are developing special products for you, handling special requests, taking care of you on the telephone or simply shipping your items appropriately and in time. We appreciate your interest in our company and products and cannot wait to get in touch with you.

# CUTTING EXPERIENCE

## CUTTING-OFF DISCS FOR METAL OR CONSTRUCTION STEEL

### PRODUCT INFORMATION

General purpose cutting-off wheel for heavy-duty cutting of ferrous metals (steel, iron welds, etc.) Excellent balance of operating ease and product life.

max. 80 m/s

Type 42

(Picture similar to product)

DIMENSIONS (MM)	QUALITY	SPECIFICATIONS	WHEEL TYPE	PACKING	PART-NO.	PRICE
115 x 3.0 x 22.23	PRO Series	A 30 R BF	42	50 PCS/BOX	KD115322	3.00
125 x 3.0 x 22.23	PRO Series	A 30 R BF	42	50 PCS/BOX	KD125322	3.50

## ABRASIVE WATER PROOF SANDING SHEETS SW211C

### PRODUCT INFORMATION

Specially treated silicon carbide paper sheets for wet metal surface sanding, and dry finishing applications on wood surfaces. Silicon carbide grain enables faster and smoother finishing. Light and flexible latex paper backing assists handsanding of contoured or irregular surfaces. Ideal for woodworking, auto body repair and stone restoration.

## SEMI-FLEXIBLE DISCS, SILICON CARBIDE, 115 MM

### PRODUCT INFORMATION

Heavy-duty silicon carbide disc for use with angle grinders. Applications include reduction and leveling of surface imperfections in concrete and can also be used with marble, granite and cast iron. Great for removing of epoxy, glue or any coating. Must be used with the appropriate backing pad. A fast way to grind softer material such as concrete and marble.

## ABRASIVE RINGS AX

### PRODUCT INFORMATION

Tear resistant cloth with reinforced backing - Spiral-shaped joint, cylindrical form - Universal applications in metalworking.

High aggressiveness when used with rubber drum DR.

## ABRASIVE BLOCK AB4S, FLEXIBLE, COATED ON 4 SIDES

### PRODUCT INFORMATION

Can be used flat and upright (four usable sides).  
 For flat and profiled surfaces due to flexible foam core.  
 Grain: Aluminium oxide  
 Robust, washable and reusable
